

Introducing the Menardi Pneumatic Air Hammer

By using the **Menardi Pneumatic Hammer** to replace gasketed filter cloths and rotary vacuum drum filter cloths, you can lower your installation costs by drastically reducing installation time and minimizing damage to the filter cloth.

The **Menardi Pneumatic Hammer** offers:

- Aluminum wheel designed to roll on top of caulking rope or rubber.
- Convex shape in the outer perimeter of the wheel prevents it from running off.
- Width of the wheel is narrower than the cord being used, which prevents damage to the filter cloth.
- Pneumatic hammer drives caulking rope in deeper than a regular hammer and wedge.

Advantages

- Offers up to a 70% timesavings.
- Reduced filter down time.
- Employee's job made easy by eliminating operator fatigue
