

Seamfree™ CONTINUOUS KNIT FILTER BAGS

Finally there's an alternative...

Are you tired of being single sourced? Looking for an alternative? Introducing **Seamfree™** - Menardi's latest continuous knit polyester filter bag.

For over twenty years, seamless continuous knit filter bags have been the product of choice in the Steel and Aluminum industries and have been used extensively in other industries as well. Over 80% of all large reverse air / shaker baghouses in the USA Iron and Steel industry use this type of filter. The only problem is that there has been limited supply... until now.

Menardi has been manufacturing and supplying filter bags since 1913. Throughout the years, we developed many of the products and technologies that have set the standard for industry today. From innovative products designed for improved filtration performance to unmatched research and development capabilities to our position as a global leader offering the most extensive range of application experience anywhere, no one can offer you more.

...shouldn't you come to the experts?

Seamfree™ filter bags.

Seamfree™ filter bags.

Seamfree™ filter bags offer (compared to standard woven filter bags):

- No seam, therefore no "banana" effect.
- Less resistance to flow.
- Lower operating differential pressures.
- Increased active filter area.
- Higher efficiencies, greater throughput.
- Better seals at the cuff areas.
- Lower maintenance costs.
- Eliminates potential needle hole leakage.
- Improved abrasion resistance.
- Longer bag life.
- Improved cleaning.
